Services and Solution

Our core business delivers transformative solutions in business intelligence and systems integration, seamlessly driving innovation and efficiency to enable scalable growth.

- **Business Intelligence for Innovation and Efficiency**
- **Digitalization, Automation, and Managed Services**
- **Consulting and Systems Integration**

CLOUD AND DATA CENTER INFRASTRUCTURE

Hybrid Cloud and Virtualization Services
Business Continuity and Disaster Recovery
Data Center Storage
End-User Computing Solutions
Server Room Design and Optimization
Infrastructure and Application Performance
Management (APM)

CYBER SECURITY

Network & Gateway Security
Endpoint and Mobile Device Security
Data & Information Security
Threat Detection and Forensics
Security Management and Monitoring
Advanced Persistent Threat (APT) Protection
Sandboxing for Threat Containment

BIG DATA PROCESSING AND ANALYTICS

Information Server
Data Management & Archiving
Data Warehouse & Datalake
Geospatial Information System
Master Data Management
Big Data Streaming
Online Analytical Processing (OLAP)

EDGE COMPUTING AND INTEGRATED INFRASTRUCTURE SOLUTIONS

- Edge Computing for Real-Time Data Processing
- Integrated Networking Solutions
- WAN and SD-WAN Optimization
- Traffic and Load Management
- IoT-Ready Infrastructure Systems
- Hardware and Peripherals

AI-DRIVEN IOT AND INTELLIGENT AUTOMATION

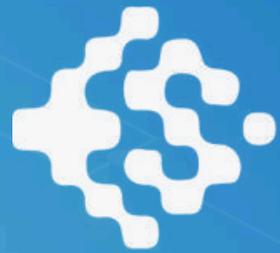

- Smart Device Integration
- IoT Data Management Platforms
- Intelligent Automation Systems
- Machine-to-Machine (M2M) Communication
- IoT-Driven Predictive Maintenance

INTELLIGENT SOFTWARE ENTERPRISE SOLUTIONS

- IT Service Management Tools
- Inventory and Asset Management Systems
- Database and Application Development
- Web Content and Endpoint System Management
- Collaborative Platforms
- Workflow Automation Solutions

DIGITAL SOLUTION

TRINUSA
TECHNOLOGIES

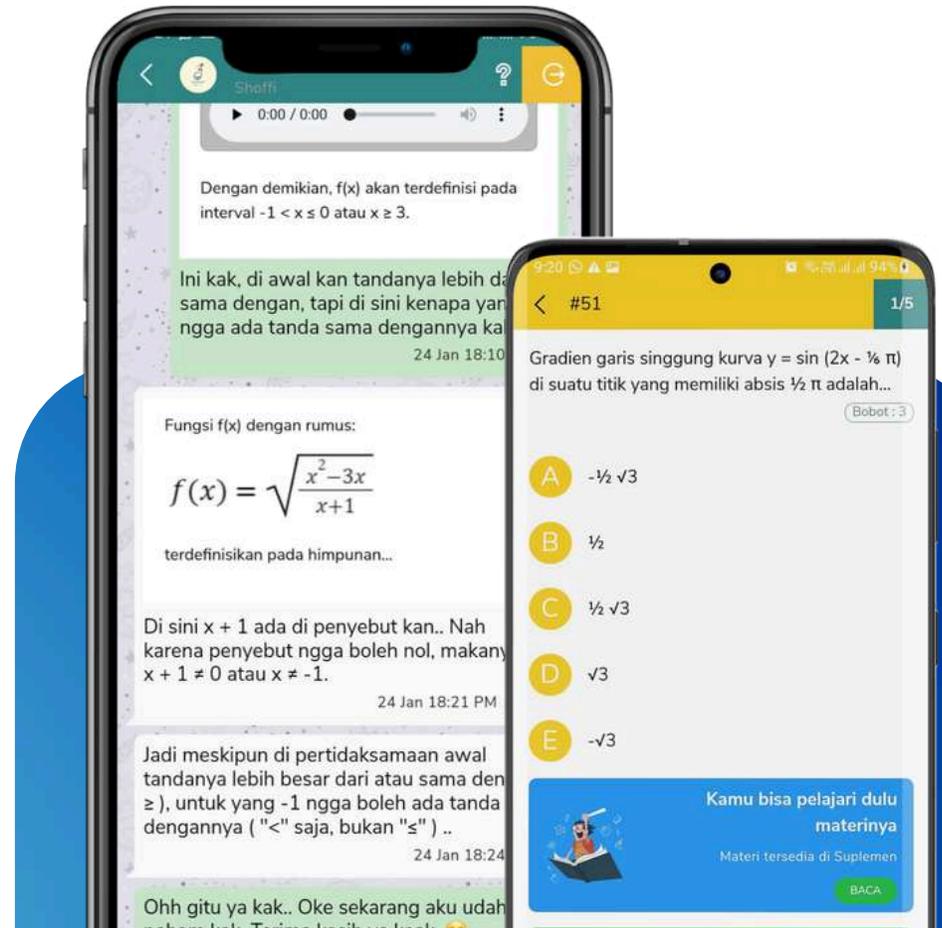

School of Business (SBMI) Learning Platform

AI-Driven Online Learning Solution

AI-driven online learning system designed to enhance education accessibility and efficiency. SBMI empowers learners and educators to achieve effective, engaging, and scalable education solutions.

Key Features:

- White-Labeling Platform
- Generative AI for Personalized Learning
- Plug-and-Play System
- Curriculum Aggregator
- Streamlined Content Delivery

build your future

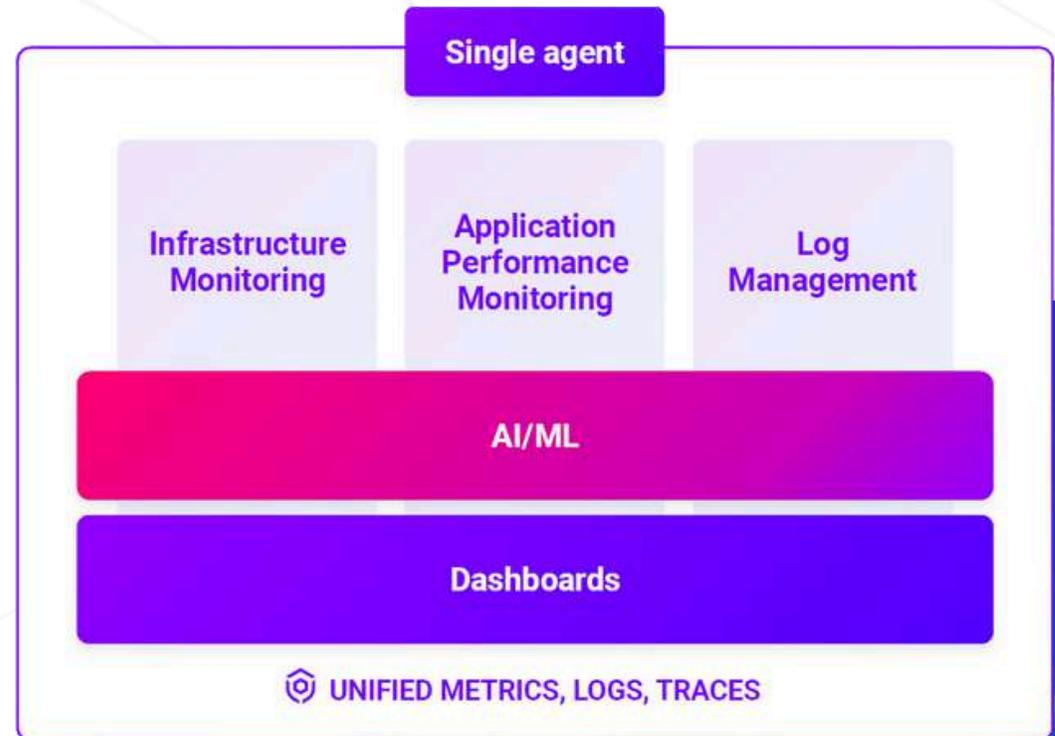

Single Agent Observability and Security System

AIOps for monitoring, cost-control, and infrastructure optimization

Unified observability and security platform that **monitors, optimizes, and secures infrastructure, applications, and user experiences**. It enhances performance, streamlines operations, and ensures robust security at scale.

Key Features:

- Unified Observability (700+ Integrations)
- Advanced AIOps
- Real User Monitoring (RUM)
- Security Integration
- Infrastructure Monitoring
- Scalable and Easy to Use

build your future

MONEV: MONITORING EVALUATION

Data Collection and Report Analysis Management System

The integrated management system streamlines data collection and analysis from mobile apps, transforming inputs into actionable reports for efficient decision-making and optimized site visit scheduling.

CORE BILLING SYSTEM

Simplifying Access, Streamlining SLAs, Enhancing Monitoring

The System simplifies access to centralized databases through a web-based platform. It streamlines SLA calculations by connecting to Element Management Systems, retrieving raw data periodically for processing, and supporting efficient monitoring in remote areas.

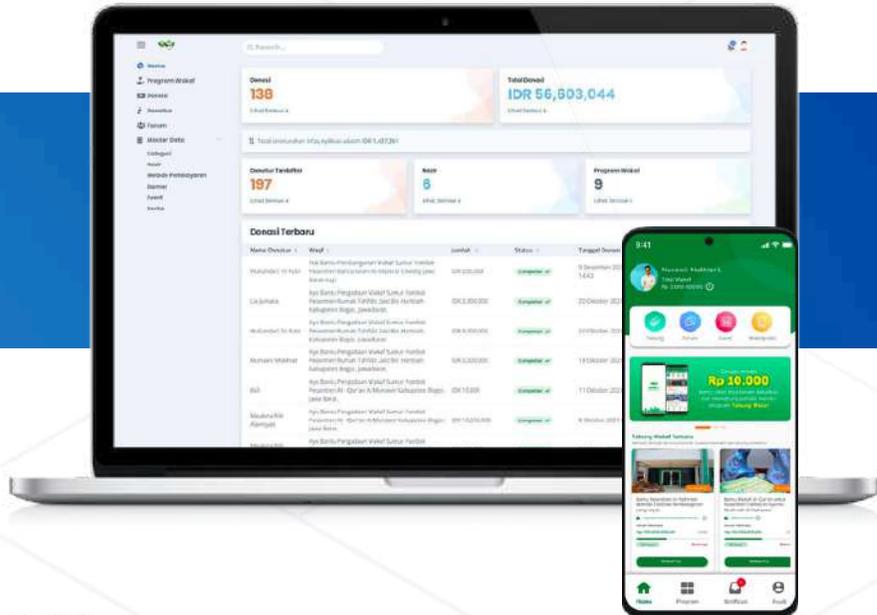

build your future

COMMUNITY FUNDING PLATFORM

Empowering Change Through Community-Driven Fundraising

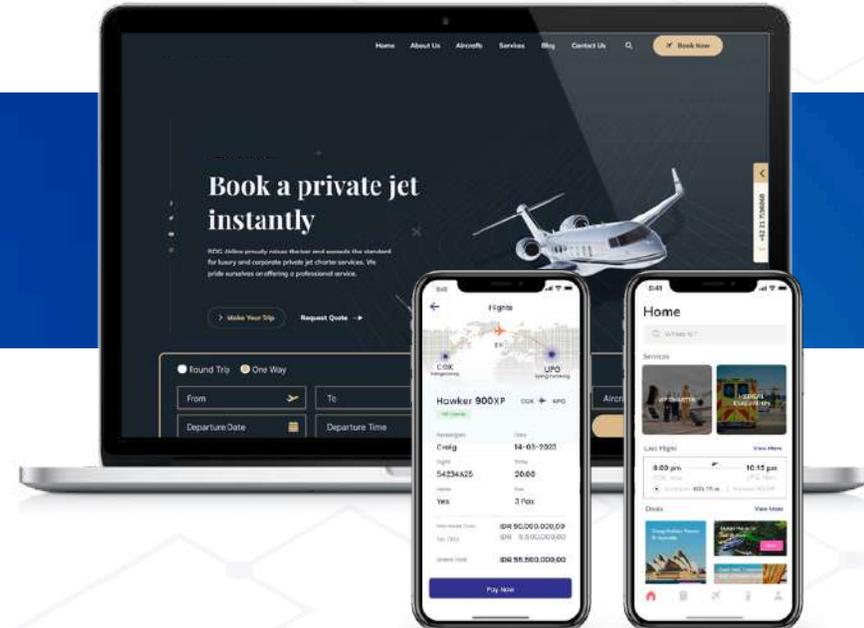

Our community fund platform connects individuals with supporters, enabling impactful campaigns, fundraising, and donor management, with features like payment gateways, project management, forums, and news.

PRIVATE JET MANAGEMENT SYSTEM

Simplifying Access, Streamlining SLAs, Enhancing Monitoring

The Flight Booking Management System streamlines travel by connecting clients to a vast network of operators, enabling customized requests and quick quotes, ensuring a hassle-free booking experience.

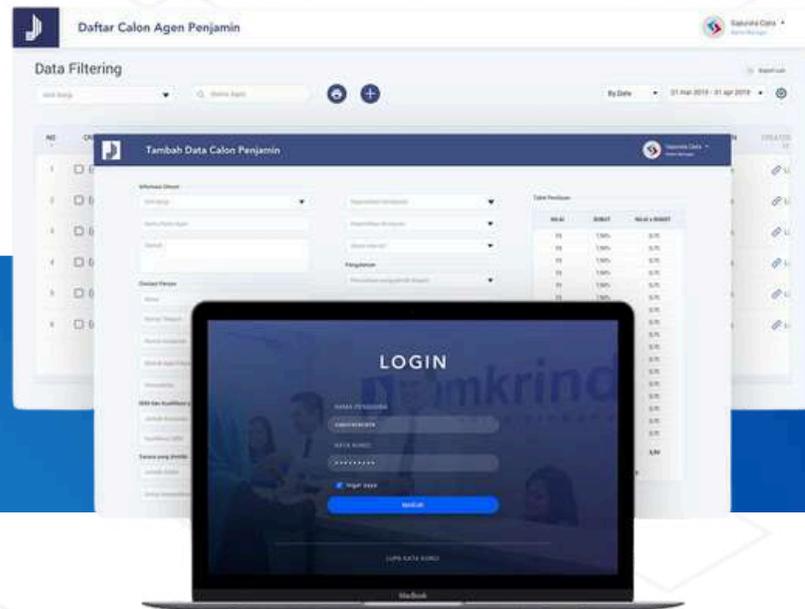

TRINUSA
TECHNOLOGIES

build your future

Guarantor Agent Scoring

Partner Scoring for Enhanced Business Efficiency

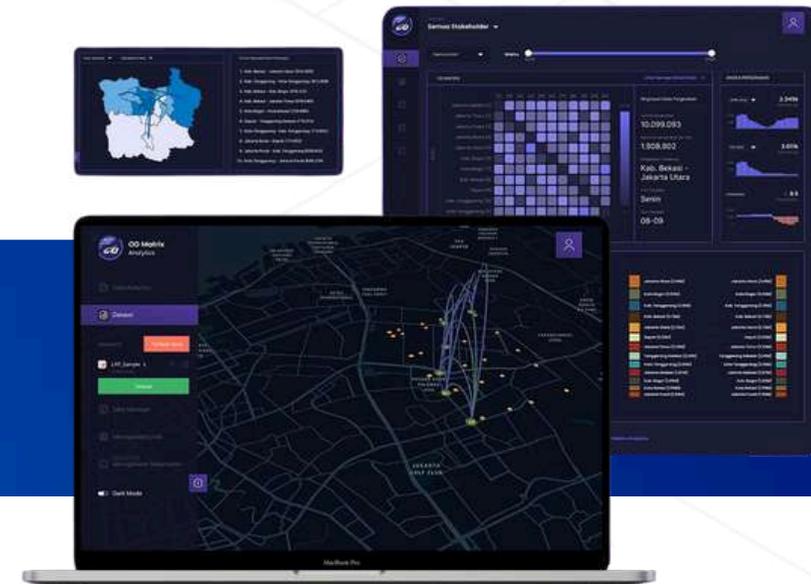

A web-based application to streamline the selection and scoring of agency partners, accelerating evaluations and identifying the best candidates for business collaboration. Fully integrated nationwide for efficient operations.

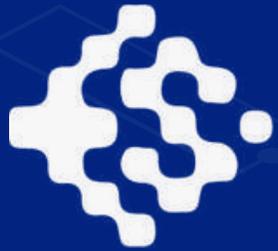

ONE MATRIX SYSTEM

Origin-Destination Analytics System

Our community fund platform connects individuals with supporters, enabling impactful campaigns, fundraising, and donor management, with features like payment gateways, project management, forums, and news.

Integrated Visitor Management System (VMS)

Enhancing Security and Streamlining Access

The Visitor Management System (VMS) is an **end-to-end security and monitoring solution designed to streamline visitor registration, tracking, and access control** while ensuring safety and operational efficiency in high-security environments.

i Key Features:

- Face Recognition
- License Plate Recognition (LPR)
- Visitor Tracking via CCTV
- Unwanted Visitor Alerts
- Attendance Management:

TRINUSA
TECHNOLOGIES

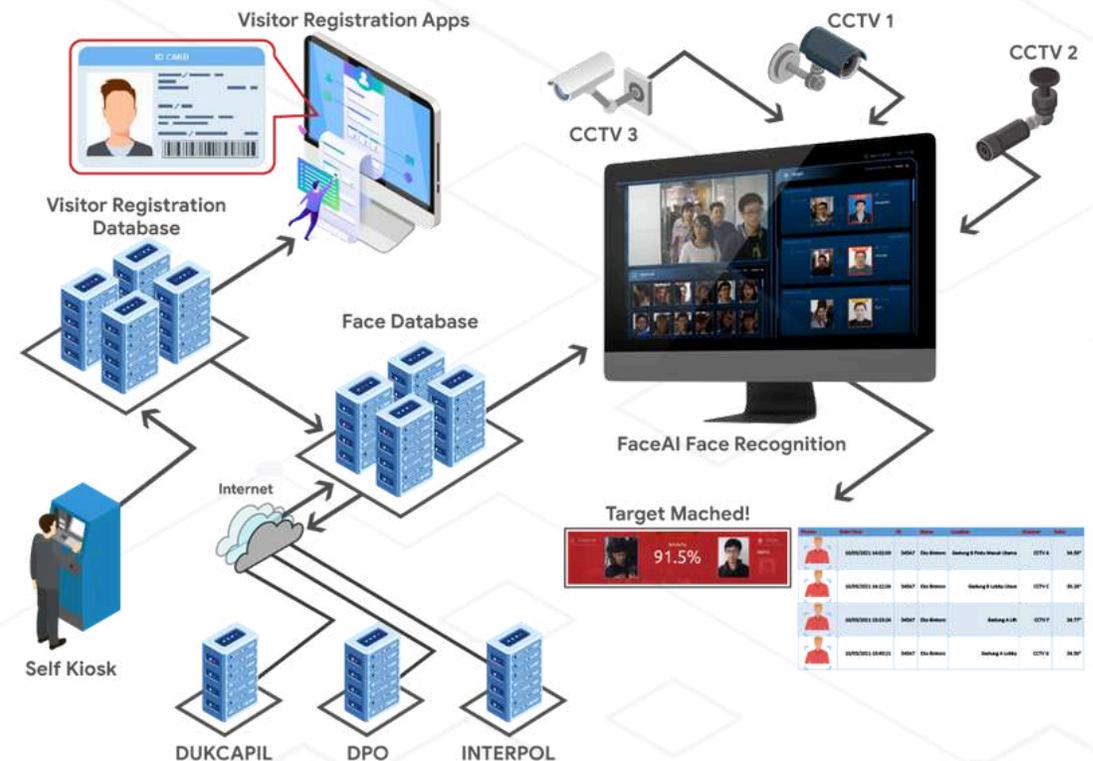

Integrated Assessment and Data Repository (IADR) Security System

The IADR Security System is a comprehensive platform designed to **centralize assessment data and enhance security management**. It streamlines data collection, storage, and analysis while ensuring robust protection and accessibility.

Key Features:

- Centralized Data Repository
- Monitoring via CCTV
- Advanced Security
- Efficient Data Analysis
- User Access Management
